## DURA LAZER TEC

### DURA LAZR TEC

#### The unique laser-hardening process

Long-lasting. Safe. Precise. Our DURA LAZR TEC press jaws set is a new industry standard. The unique ROTHENBERGER laser-hardening process, which is implemented in our own production, provides maximum stability and wear resistance. And, therefore, more safety and a longer service life!

Depth distribution of hardness was tested by the independent test laboratory of the State Materials Testing Institute Darmstadt (MPA).

#### Partial laser-hardening for highly stressed surfaces

- Ideal accuracy of contour for highest precision during the complete live time
- 40% increase in hardness\*

#### Highest degree of hardness

- ROTHENBERGER press jaws are performing with the highest degree of hardness at high stressed areas
- Even in the case of high burr formation during compression, the wear is reduced to a minimum

100% extended lifetime of the press jaws among other things due to laser hardening\*

Parts which have to be flexible stay ductile
